SUMMARY

AI & Data Science student (CGPA 8.96/10) who builds LLM and ML applications end to end, from embeddings and retrieval to FastAPI services, Docker and CI/CD. Built a document-grounded RAG chatbot in the IIT–Sunbeam GenAI internship, and an analytics platform that turns ML forecasts and SQL data into plain-language reports for decision-making. GenAI prototypes won 1st of ~200 teams (AI NEXUS 2025) and top 6 of 400+ (ACM WCE Hackathon 2026).

TECHNICAL SKILLS

- **Generative AI & LLMs:** RAG, Agentic AI, Prompt & Context Engineering, Embeddings, LangChain, Hugging Face, Groq
- **Vector & Databases:** ChromaDB, Milvus / Zilliz (vector); PostgreSQL, SQL (relational); Firebase (NoSQL); Supabase
- **Machine Learning & Data:** scikit-learn, PyTorch, TensorFlow, pandas, NumPy, EDA, feature engineering, regression, anomaly detection, MAPE, ETL, Power BI
- **Languages:** Python (primary), SQL, Java, JavaScript, C
- **Backend & APIs:** FastAPI, REST APIs, Microservices, SQLAlchemy, Streamlit, React
- **Cloud & DevOps:** AWS (S3, EC2, Glue, Athena, Redshift), GCP, Azure, Docker, Git & GitHub, GitHub Actions CI/CD

EXPERIENCE

Generative AI & Data Intern Dec 2025 – Jan 2026
Sunbeam Infotech Pvt. Ltd., Pune (IIT–Sunbeam GenAI Program)

- Built the Sunbeam RAG Chatbot, a Q&A assistant over an organisational knowledge base: document chunking, embeddings stored in ChromaDB, semantic retrieval, and answers generated by a Groq-hosted LLM through LangChain.
- Applied prompt and context engineering so the LLM sees only relevant retrieved passages, keeping answers grounded.
- Served the chatbot via FastAPI REST endpoints and a Streamlit UI; shipped with GitHub Actions CI/CD (95 commits).
- Built ETL pipelines and Power BI / Streamlit dashboards with a cross-functional team.

PROJECTS

NeuroNauts – AI Study Companion (RAG Chatbot) | GitHub | Live Demo Feb 2026
Python, Groq LLaMA 3.3 70B, Zilliz Cloud (Milvus), Sentence-Transformers, Hugging Face, Streamlit

- Built a RAG pipeline: PDF parsing → 2,966 chunks → embeddings → Milvus semantic search → LLM answers.
- Added diagram retrieval so answers show the relevant figures next to the text, which grounds responses and reduces hallucination.
- Built as a hackathon prototype; top 6 finalist out of 400+ teams, ACM WCE Hackathon 2026.

Sales Analytics Platform – ML Forecasting & GenAI Reports | GitHub | Live Demo Sep 2026
Python, scikit-learn, Groq LLM, FastAPI, PostgreSQL, Docker, GitHub Actions, React

- Built a 30-day revenue forecast (Ridge regression, 90/95% prediction bands, MAPE-based accuracy) and anomaly detection (Isolation Forest with Z-score fallback) with root-cause labels.
- Used an LLM to turn live SQL aggregates and model outputs into plain-language recommendations for decision-makers, and automated a weekly executive PDF report by email.
- Designed ingestion and validation into a PostgreSQL star schema; served results through 15+ FastAPI endpoints and a 16-view React dashboard, containerised with Docker.

LoanFlow – Digital Lending Platform with ML Risk Scoring | Live Demo
Python, FastAPI microservices, scikit-learn, Next.js, Supabase, Docker, pytest

- Built an ML credit-risk scoring service that assigns applicants to risk bands, alongside an explainable rules engine that records a pass/fail reason for every policy check.
- Enforced a maker-checker human review gate (the preparer cannot approve); added API security (RBAC, JWT, CSRF protection) and masked sensitive KYC data (Aadhaar, PAN, phone).

EDUCATION

B.Tech, Artificial Intelligence & Data Science (Hons. Big Data Analysis) 2023 – Present
DKTE Society's Textile & Engineering Institute, Ichalkaranji (NAAC A+) | CGPA: 8.96/10
Coursework: Machine Learning, Deep Learning, Natural Language Processing, Data Structures & Algorithms, DBMS, Cloud Computing
Class XII (HSC), Maharashtra State Board, 2023: 69.70% | Class X (SSC), Maharashtra State Board, 2021: 95.40%

CERTIFICATIONS & ACHIEVEMENTS

- **1st place of ~200 teams**, Hack AI Blitz, AI NEXUS 2025 (Microsoft Learn Students' Club): Tour Genie, a Q&A chatbot prototype on Azure Cognitive Services that answers questions from a curated knowledge base.
- **Technical Lead**, Data Science Student Association, DKTE (2024–2025): ran workshops and mentored 50+ peers on Generative AI and cloud tools.
- **AWS Academy Data Engineering**, 40 hrs, Apr 2026 (Credly).
- **LeetCode** 1500+ rating, 400+ DSA problems solved.
